

Irrigation Project Update April 20, 2026

Work continues on Hole 18 as the crew advances the irrigation installation by plowing in fairway and greenside lines.

Looking ahead:

- For the next several days the team will be working on #18.
- As a result, Hole #18 will be closed.

For those wishing to complete a full 18 holes, an optional extra hole has been incorporated into #12. Directions on how to play this alternate routing will be posted on site.

What golfers need to know:

Starting hole remains #1

A reminder that active construction areas are strictly off-limits. For your safety and that of the crew, please avoid all trenching and work zones as you make your way around the course.

Thank you for your continued support of our improvement project.
