

Irrigation Project Update | April 7, 2026

Our irrigation project continues its slow but noble march across the property, with work now progressing from Hole 17 toward Holes 16 and 1. Crews are currently installing mainline connections and drops for future fairway and green irrigation loops.

What golfers need to know:

- **No holes are closed at this time** (yes, somehow).
- **Open trenches and excavated areas are present** on the course, particularly around **Holes 16 and 1**.
- All work areas will be secured, but if your ball finds a trench, we recommend exercising caution... and perhaps some better club selection.

Important Change Beginning Wednesday

Starting **Wednesday, Hole #1 will be played as a par 3** until mainline work in that area is complete.

Starting Play

The current plan is for **play to begin on Hole #10 starting Wednesday**, pending final confirmation. Please check with the Pro Shop for the latest routing updates, as the course map may currently be more of a suggestion than a guarantee.

We appreciate everyone's patience as we work to improve the course, one trench at a time.
