

May 22 Update

We are pleased to report that Phase 1 of our Irrigation Replacement Project is now complete. Over the past eight weeks, the crew has installed a significant amount of new mainline pipe and upgraded irrigation heads in the following areas:

- Around the #1 green
- The entire driving range
- The entire 10th hole
- The entire 11th hole
- The entire 15th hole
- Around the #16 green
- The entire 17th hole
- The entire 18th hole

The crew will remain on site for one more week to tidy newly sodded areas and complete a few miscellaneous tasks, but no further hole closures are anticipated.

You have your golf course back.

Thank you for your patience, encouragement, and support throughout the project. The finish line is finally in view, and the course is already beginning to show the benefits of this major upgrade.
