

## MAY 13 UPDATE

The bank renovation to the 17th hole is complete and the green is open.

The driving range installation has officially crossed the finish line, and in the process, a new company benchmark was set: 45 heads installed in 2 days. Fast hands, steady rhythm, and just enough dust to make it feel like progress should feel.

With the range now fully watered and operational, the crew has shifted focus to Hole #15.

Current work:

Plowing in irrigation to the 15th green area and completing the extension of the 6-inch mainline.

What this means for play:

- Hole #15 will be closed all day (May 13)
- It will likely remain closed for a second day while work is completed
- Once reopened, it will return as a par 3, at least initially, while the area settles and stabilizes

As always, conditions evolve daily, and so does routing. Thanks for your patience as we keep threading new life beneath the turf, one fairway at a time.
